

## STEELIAN – Engineering Confidence

You can use this fresh, professional brochure just as it is or easily customize it.

- We offer:
- repair welding,
- welding of small and large assemblies,
- inspection and quality checks,
- preparation of welding and technical documentation,
- 3D modeling,
- and support for audit readiness (ISO, EN 1090, 3834).
- Reliability, precision, and expertise are the foundation of our work.

## Who We Are

### About Us

Steelian is a modern engineering partner specializing in welding, 3D modeling, structural assembly, and quality assurance.

Combining cutting-edge design with certified welding expertise (EN ISO 3834, EN 1090, IWE), Steelian delivers precise, reliable, and audit-ready solutions across small and large-scale projects.

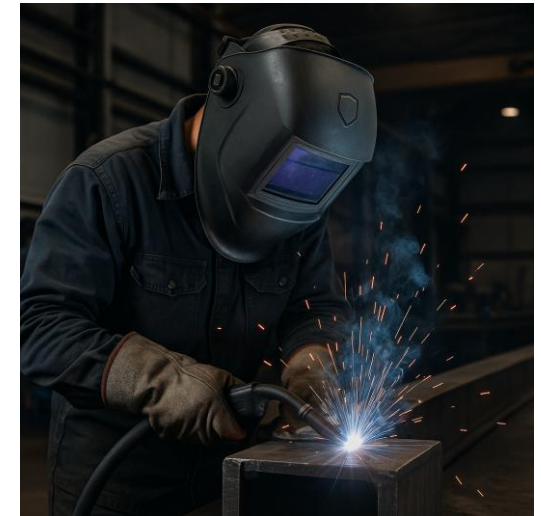

With a foundation built on trust, technical excellence, and continuous improvement, Steelian ensures every structure is forged to last.

## Our Mission at STEELIAN

At STEELIAN, we are committed to delivering precision, reliability, and engineering excellence.

Our mission is to provide high-quality welding, 3D modeling, and technical documentation that meet the strictest international standards.

We combine deep industry knowledge with hands-on expertise to support manufacturers, construction teams, and industrial partners in building strong, audit-ready solutions.

Whether it's a complex repair weld or full project documentation, we ensure every detail reflects our passion for quality.

Think our work speaks for itself? It does – but we also speak your language.

We make technical look exceptional. With consistent documentation, structured visuals, and precise wording, our brochures, reports, and inspection files are easy to follow and professional to present.

---

*“Where others stop at welding, we deliver documentation, control, and perfection.”*

---

### Get results that matter

Our services are tailored to your real-world production and audit needs – from 3D modeling to final inspection.

### Need custom formats or documents?

No problem. We adapt to your brand, your processes, and your certification scope.

### Our Products and Services

At STEELIAN, we deliver complete, audit-ready solutions in welding and industrial engineering. Our core services include:

Repair welding of damaged or worn components

Welding of small and large steel assemblies

Inspection, control, and visual checks according to EN standards

Preparation of technical documentation (WPS, WPQR, checklists)

3D modeling and component design for manufacturing

Creation of production-ready technical drawings

Audit preparation for ISO 3834, EN 1090, and customer-specific requirements

Our strength lies in combining precision workmanship with engineering discipline – so you get quality that doesn't need excuses.
